Features & Functions

WRT®

801 intercom systems is composed by building gate station, user door phone, PC and other equipments, which is based on TCP/IP. The system is with the technology of multichannel, every channel can work independently.

- 1. Suit for large community
- 2.Wall-mounted installation, touch operation.
- 3 .9.0" LCD Display, monitor the situation of the entrances and confirm visitors again, remote unlock
- 4. Can call the Guard Center, and send the emergency to Guard Center.
- 5. Call the other tenant for intercom
- 6. Ring tone Download and Mute Mode
- 7. Function for lift
- 8. Divert
- 9.8 alarm zones with arm/disarm function.
- 10. Wireless home automation control.
- 11. Check pictures, SMS etc.
- 12. Support the service for the convenience of the customers.
- 13. Parallel Operation is allowed, at most 4 Indoor Monitors can be work together
- 14. Remote update

2 Equipment Description

Caution

WRT

- 1. Do not install the stations in any of the location with waterdrop, high temperature and dust.
- 2.We suggest the installation height to be 145 cm above floor.
- 3.Be sure to cut off the power during installation.
- 4.Using wiring tube to avoid signal interference. Leave the terminals outside the tube for maintenance.
- 5. Make sure wires are connected properly before plugging in power supply.
- 6. When it is energized, cut off power at once if there is any problem.
- 7. If the system is found of any malfunction, please cut off the power and inspect according to the Trouble Shooting. If it is unable to find the causes, please contact the sales agent or the manufacturer's after-sales service department. Do not repair or replace the parts by yourself, otherwise the system may be damaged.

Installation

- 1. Make a hole at the height of 145cm and make sure it's fit for the bottom case. (Figure 1)
- 2. Open a wiring hole in the bottom of the wiring box an insert the wires through the wiring hole,

and fix the bottom case into the hole ,embed cement. (Figure 2)

3. Make 4 holes according to instruction of locating paper, with plastic expansion plug and leave

screws outside about 5mm.(Figure 3)

4.Connecting the wires, then fix the door phone with four screws. (Figure 4)

WRT

4

Installation

Figure 4

WRT

This door phone is operated by touching. It will boot normally after 30s when it is energized.

The status indicator light will become green when standby. Touch the screen when it is in standby state, and can operate it again.

There are 8 icons: Service, Monitor, Smart home, Call, Messages, Home, Settings, Media on homepage.

Touch turn off the screen, it will be in screen saver or shut down if there is no operation after 3 mins.

Settings

Specification of the door phone must be set after connected. Press "Settings" icon, turn to the interface where you can set password, room number, defence zone etc.

Password

Touch "Password" icon, and input the old password (input the PIN "88888888" for first usage), and press "#" key to confirm. If you forget the password, you can restore it to PIN through the Guard Center.

Alarm

There are two lines of indicator lights show on the behind of the main interface. Black means alarm zones dis-

abled, green means unarm, yellow means armed, red means there is a alarm.

8 alarm zones in all, zones 1 to 4 represent fire, gas, IR and magnetic contact, 5 to 8 are user-defined.

You have to enable the alarm zones before configuring.

Touch the "Alarm" icon, input the password and press "#" to confirm.

Touch "Alarm Zone" icon, click the zones to arm them and click \checkmark to confirm, click the armed zones again to disarm them. Click \leftarrow to return to previous menu.

6

WRT

Arm/Disarm: it works only if it is "home" mode.

Click the alarm zone you need, and press \checkmark , if "Du Du" sound is heard, the alarm indicator lights will

become yellow. Click armed zones and then click $\checkmark~$ to disarm.

Arm all: Click "Arm all" and click \checkmark to arm the enabled alarm zone.

Disarm all: Click "Disarm all" and click \checkmark to disarm the armed zone.

Note: Smoke and Gas zones will be arming status as soon as enabled.

Ring

Operation

7

Set ring tones for entrance station, gate station, outdoor station, intercommunication indoor monitors, alarm, message etc. Click"Ring"

WRT

Select the call in locations via " \blacksquare " or " $\boxed{}$ ", and press \checkmark to confirm, press \leftarrow to back to previous

menu.

- End of the second se
- = Delete the selected ring tones (" √ " means selected, the selected ring tone will be yellow)
- Play the selected ring tone.
- ▲ and ▼: Turn the page when there are too many ring tones.

Click "activate" can make the scene mode activate automatically on certain time everyday.

After click "activate", "activate" become "stop", click "stop" can stop the scene mode. Tenant can add several scene modes (≤ 6) at one time, then click "activate".

11

Click "Cancel All" can eliminate all scene modes which are added.

Remote on: set if remote control home furnishing. Click "Remote on/Remote off", open/close remote control.

When remote control is on, tenant can control home furnishing by Guard Center.

Time adjustment: Adjust time to keep in accordance with center unit.

System : Check IP address and functions current status.

Upgrade: Extended

Basic Setting

Click "Basic Setting" to set "Divert On" "Color" "Volume" etc.

Appendix function: User can set snapshot, key tone, etc.

Touch the function you want to set, " \blacksquare " means on, " \blacksquare " means off, press " \leftarrow " to save the data and back to previous menu.

The station will snapshot after 5s while outdoor station is calling the indoor monitor under the snapshot is on. It also snapshot after 5s while the Front door station is calling, and the photo will be saved in the Device and upload to Center.

When key tone is on, there will be an accompanying sound when every time touch the screen.

When screen saver is on, the indoor monitor will be auto-screensaver.

Touch"Language", interface will transform between CH-EN.

Select"Default Style", change interface mode:

Divert on

提示:按 "*"退格,按 "#"确认 Note:"*"for backspace,"#"for confirm

Touch "Divert on", input the time, and press "#" to confirm. Directly click "#" without input the time, it will be default "Divert on" time 12 hours.

When there is a visitor, the system will transfer the call to the Guard Center under divert on.

Please note: when it is No-disturb status and "Divert on" enabled, it will cancel "NO-disturb" status.

Cancel divert on status: Click "Cancel divert on" and click confirm icon to cancel divert on

Volume

Touch "Volume". There are 5 levels of Volume, press" + " to turn up the volume, press "-" to turn down the volume. Press \leftarrow to save the data and return to the previous menu.

14

No-disturb ON

Touch "No-disturb ON". Input the time, and press "#" to confirm. Directly click" # "without input the time, it will be default No-disturb time 12 hours.

When there is a visitor, the door phone will not ring under No-disturb status.

Please note: when it is Divert on status and "No-disturb ON " enabled, it will cancel "Divert on "status.

Cancel No-disturb ON: The icon will become cancel No-disturb ON status after set successfully. User click

"Cancel No-disturb ON" and confirm it to cancel No-disturb ON function.

Delay Settings

Touch "Delay Settings".

提示:按 "*"退格,按 "#"确认 Note:"*"for backspace,"#"for confirm

Touch ring duration input box and input the time, press "#" to confirm. Set the arm delay, upload delay and alarm duration with the same way. 15 Operation

WRT

WRT

Network settings: Only operated by engineers, can be set according to the community network layout. Restore settings: Default setting, input password and click "#" to confirm. Be cautious ! Please restart after all settings are finished.

Call

Touch "Call" icon.

Guard Center: Call and talk with Guard Center, Calling sequence is Guard Station, back up Guard Station, Guard Center, back up Guard Center. If there is no answer, it will cut off automatically. If answer in the setting time, max conversation time is 120s. The tenant could delegate Guard Center to execute the service. Tenant :Set the call format or call and talk with other tenants.

Touch"Tenant", the screen shows:

16

Operation

Dial Format Setting: Set the length of the No. Input "RULE", and press "#" key to confirm.

G(0-2): 2 B(0-3): 3 U(0-2): 2 F(0-3): 3 B(0-3): 3	1 4 7	2 5 8	3 6 9	
<u>ل</u>	 -*-	-0	- #	•

Input the numbers according to the tips, and press \checkmark to save the data.

Call the Tenant: Input the Room No. according to the dial format you have set for the tenant. If no one answers, it will cut off automatically. If answer in the setting time, max

conversation time is 120s.

You can add the Room No. of the tenant according to call format, and press "Add Contacts" to save.

You can check the numbers by touching "Check Contacts".

Duty Manager: Click it and call to Guard Center.

Monitor

The station can monitor 30s. Touch "Monitor" to select "Gate Station", "Sub Gate Station" or "Entrance Station" to monitor.

Press "▲ " or "■ " to turn the pages if there are multiple monitor points , and touch ← to exit.

WRT®

Messages

Touch "Messages".

Alarm Record

Touch "Alarm Record" to check the records, the screen will show:

当前第1页,总1页: Page 1,total 1

- = : Delete all the records (except for the locked one)
- =>>> : Delete the selected records (locked records can't be deleted)
- and s : Turn the pages when there are many records.

18

Voice Box

Touch "Voice Box" to check the records, the screen will show:

- = : Delete all the voice records (except for the locked one)
- => : Delete the selected voice records (the selected voice records would be yellow)

Press" \leftarrow " to the previous menu.

Snapshot

Touch "Snapshot" to check video and pictures, the screen will show :

Video

- : Delete all the videos (except for the locked one)
- . Delete the selected videos (the selected one would be yellow)
- Play the selected videos.
- / Image: Turn the pages when there are many videos.

Photo

当前第1页,总1页: Page 1,total 1

- : View the selected photos.

- ->>- :View the next photo.
- / Image: Turn the pages when there are many photos.

Message

Touch "Message" to check the records, the screen will show while touched:

WRT®

- : Delete all the messages (except for the locked one)
- = : Delete the selected messages (the selected one would be yellow)
- / where is a standard stand
- I Read the selected message.

- Check the previous message.
- I Check the next message.
- and signal and signal and the pages when there are many messages.

Note: When there is a new unread message, status indicator red light keep on, icon will be lighted.

Home/Outside

Express mode, one-button arm/disarm, it is convenient for users to control alarm zones.

If there is a alarm, it will alarm on-the-spot, and send the message to the Guard Center at the same time .

IR, Door Contact

After armed, the alarm will not be processed in delay time, then check, if there is a alarm, not disarm in 40s, it will alarm on-the-spot and send the information to Guard Center.

Zone5, Zone6

It will check after armed, if there is a alarm, it will alarm on-the-spot, not disarm in 40s, and send the information to Guard Center.

Zone7, Zone8

It will check after armed, if there is a alarm, it will alarm on-the-spot, and report to Guard Center.

Alarm

26

Operation

Press "" or external alarm button at any time, it will alarm and send the message Guard Center.

Lift

There are two ways for you to select. Press "I" or press "Lift" under the "call" menu if the system is connecting with the lift

Description of Door Phones connected to each other

The system supports a Main door phone can link with 3 Sub door phones.

The No. of the main door phone must be 01, and the sub door phones are 02-04.

1.No-disturb on/off, Divert on/off, you can set ringing time on any one of them.

2. Any one of the door phones can call or monitor ,each door phone can process different alarm and arm independently.

3.All the phones can receive calls at one time. When one of them is talking, other three will be cut off automa-

tically. The other three door phones can receive other calls at this time. In a word, three door phones can

receive calls from three different ways(Such as Gate Station, Entrance Station, Guard Center).

4, Door phones can talk with each other: Input R1 (Represent main door phone) /R2(Second door phone) / R3 (Third door phone)/ R4(Fourth door phone) +"#", can call the relevant door phone. For example, call 01 door phone, input "R1#"

5. The door phones which have snapshot function will take the photo and save it.

Others

1. Door phones Alarm Sensor connection: door phone can connect eight groups Alarm Sensor. Some alarm sensors are NC type(control touch spots are normally-closed when no alarm ,control touch spots are open when there is a alarm). Some are NO type(control touch spots are openwhen no alarm ,control touch spots are normally-closed when there is a alarm). When the alarm is NC type, should connect touch spots of sensors with -2.2K resistance in series (figure1). When the alarm is NO type , should connect touch spots of sensors

26

WRT

in parallel (figure 2). When connecting resistance, should connect terminal of touch spots which is near sensor, it can make the sensor alarm when the sensor of door phone is forced to remove . Ports of each group sensor can connect with multiple same sensors to monitor multiple places, method is: NC type sensor alarm touch spots are connected in series (figure 3), NO type sensor alarm touch spots are connected in parallel (figure 4). No matter how many sensors are connected in same group, just need one to be added resistance. Please note the total current of connected alarm sensors can not more than 400mA, you have to add another power supply if more than 400mA.

2.Door phone provide sensors with 2 groups 12V/0.5A voltage output ,one is non-control output, provide sensors with power source.One is control output,provide smoke sensor with power source.When there is a smoke alarm power will be cut off for 2s to reset the sensor.

3. When there is no power on the plug, all function cannot be used, add a storage battery for video power supply.

4. There is a socket for connecting external alarm input. Usually, if the alarm input and GND short circuit, it will send the alarm to Guard Center.

5. External calling bell can be connected with door phone, press it and "Dingdong" sound will ring out three times.

6.Tenant can arm/disarm the door phone via Guard Center.

7.Unlock by password or cards which are registered in Guard Center, it will disarm the armed zones.

8.When standby, press" " "for more than 3s,then release, enter screen calibration function.

9. The icons in top right corner of monitor reflect its functional status, the icons will show if monitor network con-

29 Trouble Shooting

Trouble Shooting

Description	Check	Solution
Door Phone does not work	Check the power supply wire	Connect the wires correctly
Door Phone can not call & alarm to Guard Center	Check connection of the network wire. Check network parameters	Connect the network wire correctly and set network parameters correctly.
Door Phone does not ring when Gate Station call	Check connection of the network wire Check if the volume is the minimum or not Check if it is in no-disturb mode or not	Connect the network wire correctly, reset the ring tones and quit the No-disturb mode
Door Phone without monitor image	Check network parameters	Reset all the IP addresses
Detectors cannot alarm	Check if the alarm zones are enabled Check if alarm zone is armed or not Check the connection of the sensors.	Connect all the sensors correctly and reset door phones
Door Phones cannot call each other	Check if input correct number	Input the correct room numbers

30 Trouble Shooting

Wiring

1. Defence Zone $1 \sim 4$ can connect the short circuit or open circuit sensor, but could not be connected to the pulse signal probe as the switching signal time is more than 200 millisecond.

3. There are two ways of connection: NO mode and NC mode. Please connect correctly by reading the operation pages in this instruction.
