New next generation i-on30R and i-on40H panels now available

Reliable, flexible and securely connected.

i-on30R radio control panel

- 30 zone radio control panel expandable to 60 zones

i-on40H radio control panel

- 40 zone hybrid control panel expandable to 80 zones

Next generation features

- Highly secure encrypted web browser: mobile and tablet friendly interface for rapid on-site system configuration
- Email notification: Provides detailed system event information and image verification, when alarm is activated
- Visual verification: link indoor and outdoor cameras through the panel, receive images via email notification
- SIA over IP: IP communication to your ARC with no requirement for a PSTN line, removing call charges and line fees

- Panel software updatable: provides choice of easy firmware update methods using Ethernet, SD card and USB
- Perimeter zone functionality: extend protection to site boundary, using our new external PIR
- Class leading Scantronic radio: 30 years of reliable radio technology you can depend on
- Decimal hybrid expansion: add radio or wired expanders, allowing installation to be tailored to the site
- EN50131 Grade 2: Independently approved
